Editorial

1 Evidence-based cervical facet consensus: access or outcome?
R Derby, M P Stojevic, D J Kennedy

Special article

3 Consensus practice guidelines on interventions for cervical spine (facet) joint pain from a multispecialty international working group

Research reports

60 Percutaneous cryoneurolysis of the lateral femoral cutaneous nerve for anaesthesia following skin grafting: a randomized, controlled pilot study
J J Finneran IV, A N Schaer, M W Swisher, L N Godat, J G Lee, S M Higginson, B M Ilfeld

62 Evaluation of trends in continuous peripheral nerve block utilization for total knee arthroplasty within and outside the Veterans Affairs Healthcare System

Infographic

64 Femoral triangle block plus iPACK block versus local infiltration anaesthesia for anterior cruciate ligament reconstruction: an infographic
E S Scheidwe, R K Gupta

Case report

65 Ventriculo-lumbar perfusion and inhalational anesthesia with sevoflurane in an accidental intrathecal injection of tranexamic acid: unreported treatment options
S Gode, M J Gradiské, T Mirkovic, P Gradiské

Letters

69 Novel method of locating the foramen ovale: a wobbly chair with shaky legs
J L De Cordoba, C García-Marguetá, N Isach

70 Novel method of locating the foramen ovale: a stable chair with solid legs
L He, Z Guan

70 Femoral artery block: the relationship between visceral and ischemic pain
A Boezaart, C Smith, Y Zasimovich, M A Reina

71 ‘It’s not over until it’s over’

72 In reply to Schnabel et al.
F W Aldallah, N Hussain, R Brun

73 Ultrasound-guided retrolaminar cervical block
U Hochberg, J de Santiago Moraga

74 Cervical erector spine versus retrolaminar plane block as an alternative to classical interscalene block
B C H Tsui, H Elsharkawy

76 Toward precision regional anesthesia: is the PENG block appropriate for all hip fracture surgeries?
R Kim, B C H Tsui

77 In reply to: ‘towards precision regional anesthesia: is the PENG block appropriate for all hip fracture surgeries?’
