

Study	Selection - 1. Does the patient(s) represent(s) the whole experience of the investigator (centre) or is the selection method unclear to the extent that other patients with similar presentation may not have been reported?	Ascertainment - 2. Was the exposure adequately ascertained?	Ascertainment - 3. Was the outcome adequately ascertained?	Reporting - 8. Is the case(s) described with sufficient details to allow other investigators to replicate the research or to allow practitioners make inferences related to their own practice?
